

## Protective Coatings & Secondary Containment Linings

- Containment Bund Linings – durable systems with excellent chemical resistance
- Elastomeric – crack-bridging flexible systems
- Waterproofing – block, plaster, concrete panel

## Grouting – Cementitious & Epoxy

- Machine bases – self-smoothing epoxy and
- Cementitious grout
- Pre-cast panel construction

## Joint Sealants

- Pre-cast panel – flexible and fire rated
- Chemical resistant – water/waste treatment,
- Secondary containment
- Heavy Traffic resistant – two component durable
- Systems
- Refrigeration – low modulus

## Waterproofing Membranes (applied for E2 compliance)

- Flat roofs – flexible seamless polyurethane systems,
- Torch-on membranes – Licenced Building Practitioners
- Balconies – slip resistant surfaces, crack bridging
- Tanking

## Concrete Repair - Structural & Non Structural

- Precast panel repair - shrinkage compensated hand packed mortar repair
- Crack repair - resin injection
- Spalling repairs - corrosion treatment
- Structural repair - pourable, rapid setting micro concrete
- Fairing mortars - repair surface imperfections

## Flooring - Industrial Polymer Systems

- Concrete Sealers - curing agents
- Warehousing - high build roll-coat systems
- Slip-resistant surfaces - silica or oxide textures
- Car park decking - traffic resistant systems
- Heavy-duty durable surfaces - metallic reinforced toppings
- Moisture barriers - allows flooring systems to be applied to new concrete pour
- Multi-coloured - any colour you want

Feel free to send this flyer onto others who may benefit from our services, we look forward to working with you in the future.
